

Face Folding

Step 1:

Copy a picture of a famous person from the internet.

Open a new document in Photoshop. Leave the preset size as "Clipboard"

Paste the image into Photoshop.

Step 2:

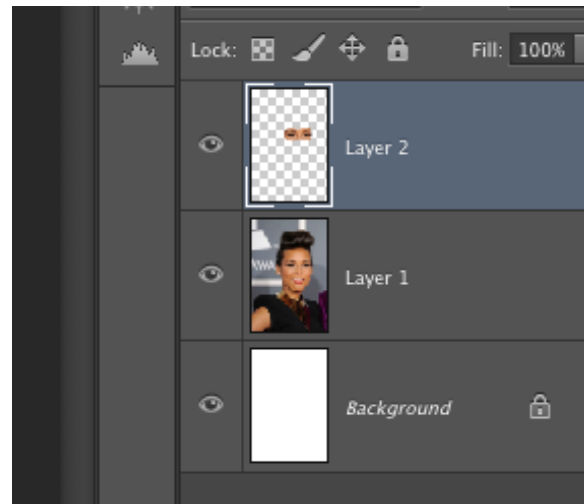

Use the polygonal lasso to select the eyes.

Step 3:

Go to Edit > Copy
Then go to Edit > Paste

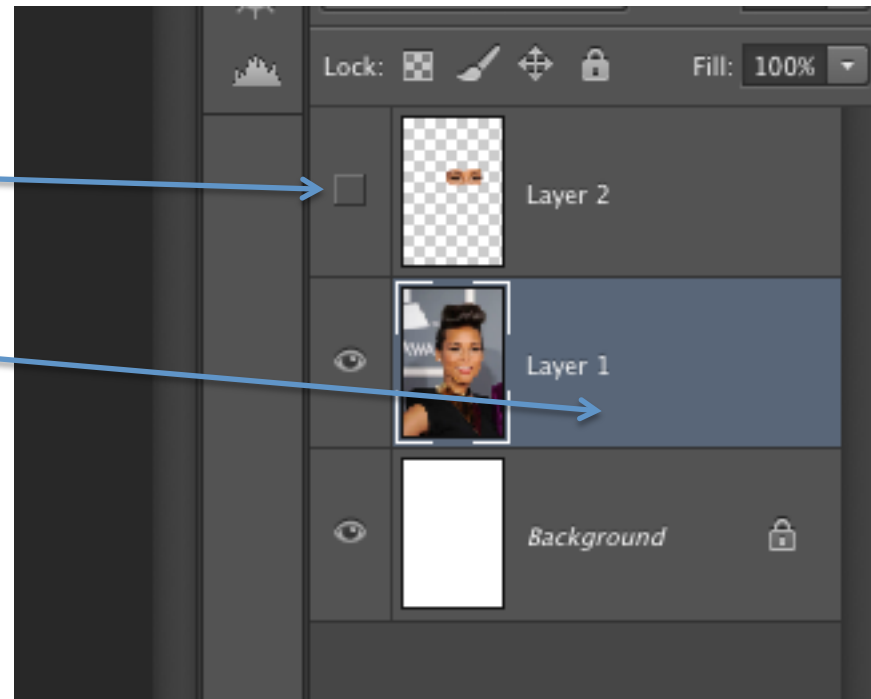

You should now have three layers.

Step 4:

Turn off layer 2 by clicking on the eyeball.

Click on Layer 1 so its highlighted.

Step 5:

Use the Clone Stamp Tool to remove the eyes and the nose on Layer 1.

Step 6:

Click on the eyeball on Layer 2, and move the eyes closer to the mouth.

Step 7:

Click on the the Eraser tool.

Choose a soft edge brush, and size it to 15 px.

Turn the Opacity down to about 30%

Step 8:

Click and drag/scribble over edges of images where eyes were cut until blended in to image below.

Before

After

Step 9:

Save as a jpg and post to weebly!
